

Just Dough Lightpaper

- Introduction

Just dough is one of the first projects launched by the Dough Launch Pad. Both developers are investors of Dough and look to create a solid long-lasting project with the input of the community.

- Dough-Nomics

Just Dough has been created using the same ground-breaking contract as Dough. The contract will reward holders with reflections when there is a downtrend to avoid excessive sell pressure from the contract. During an uptrend, the rewards will be in form of Dough tokens.
